# Workstation Security Assessment
Migrate to Windows 11 and secure your new standard configuration

Support for Windows 10 ends in October 2025. Without patches, workstations become easy targets for attackers. Our assessment identifies vulnerabilities in your Windows 11 environment and helps you secure your new image

Objectives

A comprehensive assessment designed to identify vulnerabilities on your workstations. Our approach simulates different attackers: physical, network, user, social engineering, and administrator, in order to detect and fix weaknesses before they can be exploited.

Detect vulnerabilities related to various threats

Reduce the risks of malware, ransomware, and data leaks

Preparing the new Windows 11 configuration

Strengthen the security posture of the new image

Scope of the analysis

Basic Windows components	Third-party software	Antivirus/EDR configurations	Perimeter protections	Data Leak Prevention (DLP)

Methodology

Configuration assessment
Vulnerability discovery
Comparison of the configuration with the CIS baseline
Impact demonstration
Complete report and recommendations

Deliverables

Executive summary: synthesis of results and dashboard for decision-makers
Technical report: detailed technical findings of discovered weaknesses
CIS Baseline: comparison of the configuration against CIS control points

Key areas of the assessment

| BIOS & Encryption configuration	Disk encryption & DMA	Windows configuration	Advanced features (PPL, AppLocker, Credential Guard)	Third-party software configuration
Protocols & network filtering	Privilege escalation	Secret extraction	Web/email filtering	Antivirus / EDR

Evaluation options

Level	Description	Evaluation options					Price (CHF)
		Windows core	3rd party	AV/EDR	Perimetric	DLP	
Lite	Basic configuration review	✅	❌	❌	❌	❌	6'000
Standard	In-depth vulnerability analysis	✅	✅	❌	❌	❌	9'000
Comprehensive	Complete security posture assessment	✅	✅	✅	✅	✅	12'000 - 15'000

All levels include a final presentation of results and tailored recommendations.

Why Orange Cyberdefense ?

20+ years of experience in penetration testing
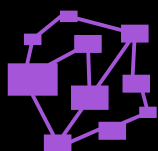

Over 400 assessments conducted annually

Largest pentest team in French-speaking Switzerland

Recognized contributions to DEFCON, GitHub, Insomni'hack

Local expertise with an international scope

Support for Windows 10 ends on October 14, 2025.

Anticipate threats. Have your workstations evaluated now and prepare for a smooth transition.
