FORTINET®

Votre sécurité combine-t-elle
la protection derrière vos
murs... et au-delà ?

Evolution des tendances marché

Adoption du Cloud

Environ **70%**
des sociétés utilisent des
applications SaaS aujourd'hui

Gestion des effectifs

Seules **16%** des sociétés sont
entièrement en télétravail

Approche Zero Trust

saasacademy.com | forbes.com | virtualizationreview.com

Les fuites de données ne sont plus à la marge

**16 milliards
d'identifiants volés**

11/07

Vol de 530 000 dossiers patient et 45 000 pièces d'identité dans un hôpital français

20/07

Vol de données client Louis Vuitton en France, Corée du Sud, Turquie et UK

12/08

Vol et revente de millions de données client Air France KLM et Bouygues Telecom

24/08

Fuite de données de centaines de milliers de clients Auchan

30/08

Vague d'emails de phishing auprès des clients Free à la suite des données compromises l'année dernière

Challenges rencontrés pour sécuriser les accès

Pourquoi le modèle historique ne suffit plus ?

Aujourd'hui les environnements mettent en exergue des silos entre les couches d'infrastructure et de management, dans un contexte fort de diversification des utilisateurs et des applications.

- ✗ **Complexité :**
Multitude de solutions, hétérogènes et non coordonnées
- ✗ **Risques :**
Prolongation du temps de détection et réponse, et exposition accrue à des vulnérabilités
- ✗ **Coût :**
Augmentation des coûts opérationnels et d'infrastructure
- ✗ **Manque d'agilité :**
Limitation de la capacité à faire des modifications régulières

Changement de paradigme : l'approche Plateforme

Le nouveau paradigme repose sur la capacité des silos à converger et se consolider sur une plateforme intégrée unique.

Réduisant la complexité, les risques et les coûts, et augmentant l'agilité

Transformer les silos en cas d'usages :

Infrastructure 'Mesh'

- Secure SD-WAN
- Secure Multi-Cloud
- Secure Campus
- Secure Branch
- Unified SASE

Security Operations

- Conformité
- Observabilité
- Automatisation
- Reporting
- Axées sur les applications

L'objectif du SASE est...

Peu importe où se situe l'Utilisateur

Peu importe où est la Donnée ou l'Application

En utilisant le Cloud
quand approprié

L'approche Fortinet's Unified SASE

FortiSASE Use Cases

Secure Internet Access for Remote Users

Enable secure web browsing for remote users to protect from known and unknown threats

FortiSASE SIA

SaaS Control and Data Protection

Address Shadow IT visibility challenges by deploying SaaS application control and safeguard data loss prevention

FortiSASE SSA

Upgrade Remote Access for Private Applications

Explicit application access under a zero-trust access or with SD-WAN integration to ensure secure application access

FortiSASE SPA

Secure Internet Access

For Remote Users, Thin Edge and Branch Locations

Flexible steering methods

Agent, agentless, thin edge and branch access. Branch access can be either through a 3rd party router or a FortiGate.

Malware & Ransomware prevention

Prevent threats with cloud-based Firewall, IPS, Web Filtering, Anti-virus, DNS and File Filtering, Sandbox, RBI

Full Threat Protection

Deep SSL inspection of web & SaaS apps for threats, Best in class security efficacy and zero-day threat protection with AI powered FortiGuard Security Services

Secure SaaS Access

For Visibility and Control

Cloud App Access Control

Safe Cloud Application access based on user context and blocking of malicious apps with in-line CASB feature, including Zero Trust posture checks

Deep control & view of apps content

Control over app content and files with API-based CASB for enhanced security and threat detection

Unified agent for anywhere detection

FortiClient Agent covers all the use-cases from SASE, Zero-trust, SaaS security, and End-Point Protection

Zero Trust
Security Posture

Secure Private Access

With ZTNA integration

Secure Cloud & datacenter app access

Secure anywhere access to corporate applications in datacenter and cloud with deep security inspection

Universal Zero-trust Network Access

User identity and device context-based zero-trust access to explicit applications from remote or on-prem location. Agentless flexibility via portal.

SPA Connector (2 options)

Lightweight VM to integrate FortiSASE with the customer private applications.

Existing FortiGate in Datacenter can be leveraged to integrate FortiSASE with the customer private apps in minutes

Secure Private Access with SD-WAN Integration in 5 min!

SD-WAN Private Access

SD-WAN Integration with existing SD-WAN Hub from any **SASE PoP**

Fast access to applications using **SD-WAN** from SASE PoP to SD-WAN Hub

Broader app support
(UDP-based VoIP, video, UC)

Foundation of Unified SASE

ONE OPERATING SYSTEM

Single OS

SD-WAN, SSE, NGFW, ZTNA

UNIFIED MANAGEMENT PLANE

Central Management

SSE, SD-WAN, ZTNA

ONE ANALYTICS ENGINE

Integration with SOC

Data lake for security operations

UNIFIED ENDPOINT AGENT

Single agent

EPP, SASE, ZTNA, CASB, DEM

AI-Driven Security Services with Flexible Consumption

GenAI integration

GenAI security (SSE) & GenAI assistant (SDWAN)

FortiGuard Labs

AI-Driven Security Services
