

## Combine the strength of a Vulnerability Management service, with a monitoring service of your critical assets.

### Identify the weaknesses before the attackers do...

Vulnerability scanning needs to be done continuously and there needs to be a process in place for what to do with all the data that the vulnerability scanner provides.

**Vulnerability Intelligence Watch** is a vulnerability monitoring service. It allows you to be informed in real time of the vulnerabilities impacting your information systems and the patches to be applied.

Imagine having continuously vulnerability scanning done, while also having a team of experts monitoring your critical assets for vulnerabilities. The team of experts will even provide you with the patches you need to apply.

This would minimize your attack surface significantly, and at the end of the day Cyber security comes down to managing your risk.

Orange Cyberdefense offers you the following combined services to enhance your security posture and minimize your attack surface.

- Vulnerability Intelligence – Identify
- Vulnerability Intelligence – Watch
- One yearly external Penetration test  
Performed on your active internet facing IP's

#### Pricing:
