

# OT mapping and architecture-audit

## Facts

Wintersports

ongoing  
since 2019

~8 days  
support

## Context

As part of his safety considerations, the customer wants an audit of the architecture and configuration for one of its detachable chairlifts in one of its ski resorts.

- Benefits
- Raise awareness of current risks
- Identification of projects to be carried out to secure critical or exposed equipment
- Better communication and understanding between IT and OT teams

**Orange**  
Cyberdefense

## Solutions

- Identification of system and network vulnerabilities
- Asset inventory and cartography of equipment
- Recommendation to secure the system architecture
- Recommendation for a remote maintenance solution
