Service overview

Managed Compliance Monitoring

Key benefits

Improved productivity
Cloud based and proactively managed market-leading SIEM platform complemented with proprietary Orange Cyberdefense technology reduces management overhead, complexity and costs.

Reduced risk
Reporting or alerting on compliance violating events places focus on high-priority remediation requirements lessening the risk to business operations.

Reduced costs
Fully-fledged SIEM functionality without the costs of purchasing and maintaining self-managed on premise or cloud devices.

Improved compliance
Internal or regulatory compliance policies auditing requirements fulfilled thorough 365-day storage of logs.

Increased visibility
SLA-based alerting highlights potential abnormalities or indicators of violation.

Holistic security approach
Event collection across the estate's devices ensures improved compliance reporting.

Ongoing detection improvement
Tuning and retuning log collectors reduce false positives over time increasing ability to accurately report on compliance violations.

Service description

Fuelled by an ever-increasing number of rules, requirements, procedures, audits and accountability created by legislation, the complexity of today's compliance standards means that businesses find it complicated and expensive to introduce and maintain the compliance measures upon which their business depends.

Many organisations have invested heavily in technology to ensure that network intrusions can be identified as soon as possible. A simple misconfiguration or product update may not only jeopardise the security of the network but may also expose the organisation to compliance-breaching conditions.

Breaching of regulations may lead to:

- Legal action being brought against the organisation or its employees that could result in fines, penalties, imprisonment, product seizures, or debarment
- Financial impact affecting the organisation's profitability, share value, expected future earnings, budgets or investor confidence
- Enforced embargos or manufacturing shutdowns disrupting the organisation's ability to operate or supply chains
- Negative perception of the organisation's reputation or brand such as adverse press or social media discussion, loss of customer trust, or decreased employee

Due to the business-impacting consequences a breach of regulations could have, ongoing compliance monitoring through immediate alerting of compliance-breaching circumstances has become integral to organisation's risk management programmes.

Using templated or custom-written rules, Orange Cyberdefense's Compliance Monitoring provides monitoring, management and reporting designed to address the compliance challenge at a fraction of the cost of DIY solutions or dedicated in-house staff.

Our Compliance Monitoring services are available as a standard option not including per incident alerting or customised triggers and as an advanced full-featured bespoke option.

Why Orange Cyberdefense

Orange Cyberdefense is the expert cybersecurity business unit of the Orange Group. As Europe's go-to security provider, we strive to build a safer digital society.
We are a threat research and intelligence-driven security provider offering unparalleled access to current and emerging threats.

Orange Cyberdefense retains a 25+ year track record in information security, 250+ researchers and analysts 16 SOCs, 10 CyberSOCs and 4 CERTs distributed across the world and sales and services support in 160 countries.
