

# OT cartography and detection solution

orange™

## Facts

Aviation  
Industry

ongoing  
since 2019

~30 days  
support

## Context

As part of its cybersecurity roadmap, the customer wishes to carry out a cartography and implement a detection solution on the OT part for two of its shop floors.

## Benefits

- Raise awareness of vulnerabilities on the OT part
- Real time visibility of OT flows and equipments and therefore of abnormal behaviour
- After restitution: better communication and understanding between the IT and OT teams

Orange  
Cyberdefense

## Solutions

- Asset inventory of OT equipment (PLCs and Computer Numerical Control)
- Cartography of industrial flows
- Installation and commissioning of the sensors and management console
- Training on the detection solution
- Recommendation of an architecture in order to optimize the detection perimeter
