

# Managed Workspace Protection for Microsoft Defender XDR

## Security Posture improvement made simple

As Microsoft Defender XDR continues to establish itself as the leading security solution worldwide, many organizations face challenges in sourcing the expertise needed to effectively manage it.

In these environments, it is crucial for enterprises to maximize their investment in Microsoft Defender XDR by leveraging it fully according to best practices and staying current with its evolving features.

With our Managed Workspace Protection for Microsoft Defender XDR, you can depend on our Security Operations Center (SOC) experts to continuously monitor your entire IT environment. We ensure that your organization always maintains the highest levels of cybersecurity.

### Our promise to you:

Fully optimize your Microsoft Defender XDR Modules and functions by entrusting them to Orange

## Prioritize and address your risks with four modular solutions:

### Managed Workspace Protection for Microsoft Defender XDR

#### Endpoint

#### Office 365

#### Identity

#### Cloud Apps

Risk Prioritization

Attack Path Management

Security Roadmap

## Key benefits

Simplify Cybersecurity Management across the Defender solutions (MDE, MDO, MDI, MDCA).

Protection against the highest-priority risks targeting your endpoints, identities, emails, and users.

A predictable and modular cost model based on the scope size, number of users, servers and Defender modules.

A continual enhancement of the security posture and a better user experience on the Microsoft solutions.

Leverage our investment in Research & Development, Cyber Threat Intelligence and automation so you don't have to.

Peace of mind of a MSSP thanks to the 24/7 support service with SLAs on operational management.
