Microsoft

Improve security posture and protection of hybrid and multi-cloud infrastructure workloads

Secure Multi-Cloud Environments Workshop

Partner-led workshop highlights

» Onboard additional hybrid and multi-cloud resources to Microsoft Defender for Cloud.

» Analyze security threats and vulnerabilities and get recommendations for mitigation.

» Hands-on training in ongoing security monitoring and incident response.

» Learn how to operationalize Microsoft Defender for Cloud to reduce overhead.

Security threats are compounded by the complexity of hybrid and multi-cloud environments. With more of our most critical data existing solely in the cloud, and maintaining consistent access controls is challenging, the need for integrated protection for your multi-cloud resources, apps and data is increasing.

Knowing your security posture is essential

Knowledge is power. In order to protect your most essential cloud-based data, and defend yourself against potential threats, you need a clear picture of your hybrid and multi-cloud security.

The **Secure Multi-Cloud Environments Activator** will help you to assess your current security posture, broaden the scope of protected resources, and develop a plan of action for remediation, using products you already own.

As organizations continue to adapt to hybrid and remote workflows, assessing your current security posture is vital. Microsoft Defender for Cloud will allow you to assess and protect your hybrid and multi-cloud infrastructure workloads, so that you can remain nimble, no matter the environment.

By attending this workshop, our experts will work with you to:

Assess your current environment and determine priorities for a hybrid and multi-cloud security and protection solution, utilizing tools you already own.	Discover vulnerabilities and threats to your hybrid and multi-cloud workloads and develop strategies for mitigation, based on your specific needs.	Protect additional hybrid and multi-cloud resources by onboarding them to Microsoft Defender for Cloud.	Create a personalized plan for integrating Microsoft Defender for Cloud into your current security operations and determine actionable next steps.

Secure Multi-Cloud Environments Activator

Analyze	Define Scope & Design	Discover & Protect	Operationalize	Next Steps
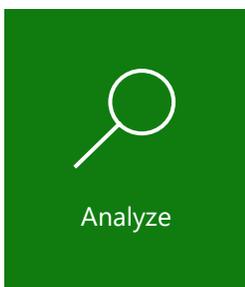

# What we'll do during the Secure Multi-Cloud Environments Activator.
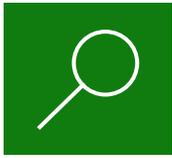

Analyze requirements and priorities for a hybrid and multi-cloud security posture management and threat protection solution.

Protect additional hybrid and multi-cloud resources by onboarding them to Microsoft Defender for Cloud.

Define scope & design for additional hybrid and multi-cloud resources to be protected by Microsoft Defender for Cloud.
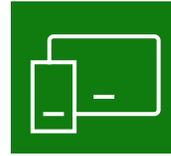

Provide guidance on how to integrate Microsoft Defender for Cloud into your security operations.

Discover vulnerabilities and threats to hybrid and multi-cloud workloads and provide recommendations on mitigation strategies.

Recommend next steps on how to improve security posture and protection of hybrid and multi-cloud infrastructure workloads using Microsoft Defender for Cloud.

What to expect

By the end of this workshop, experts in Microsoft security will provide you with:

Insight into the current state of your hybrid and multi-cloud security posture management and threat protection with an analysis on requirements and priorities.

Recommendations for reducing the attack surface area for your hybrid and multi-cloud resources and workloads and in-depth guidance on how to integrate Microsoft Defender for Cloud into your security operations and reduce operational overhead.

Increased protection of additional hybrid and multi-cloud resources and a better understanding of how to prioritize and mitigate potential threats to all your existing resources and workloads.

A defined, personalized plan for actionable next steps, including a timeline for remediations, based on your organization's specific security needs and objectives.

Why Orange Cyberdefense?

When it comes to security, you need an experienced partner. When it comes to security, you need an experienced partner. When it comes to compliance, you need an experienced partner. Orange Cyberdefense is the expert cybersecurity business unit of the Orange Group, providing managed security, managed threat detection and response services to organizations around the globe. As the leading security services provider, we strive to build a safer digital society. We are proud to say we can offer global protection with local expertise and support our customers throughout the entire threat lifecycle.
